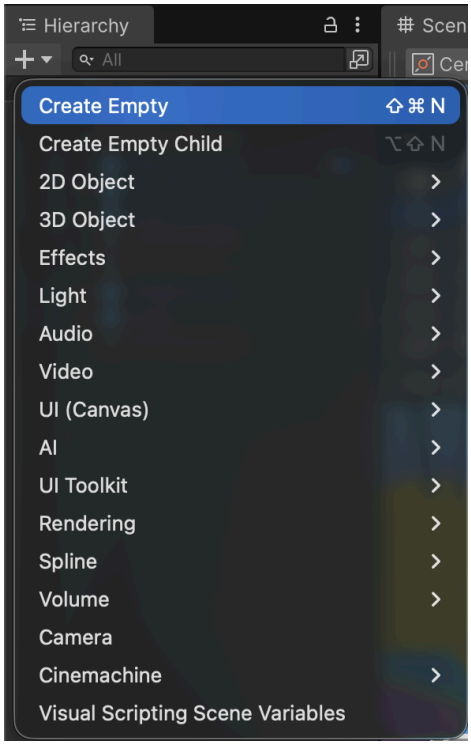
Make a Dynamic Asset

In Unity, Create a Prefab:

Create An Empty Object:

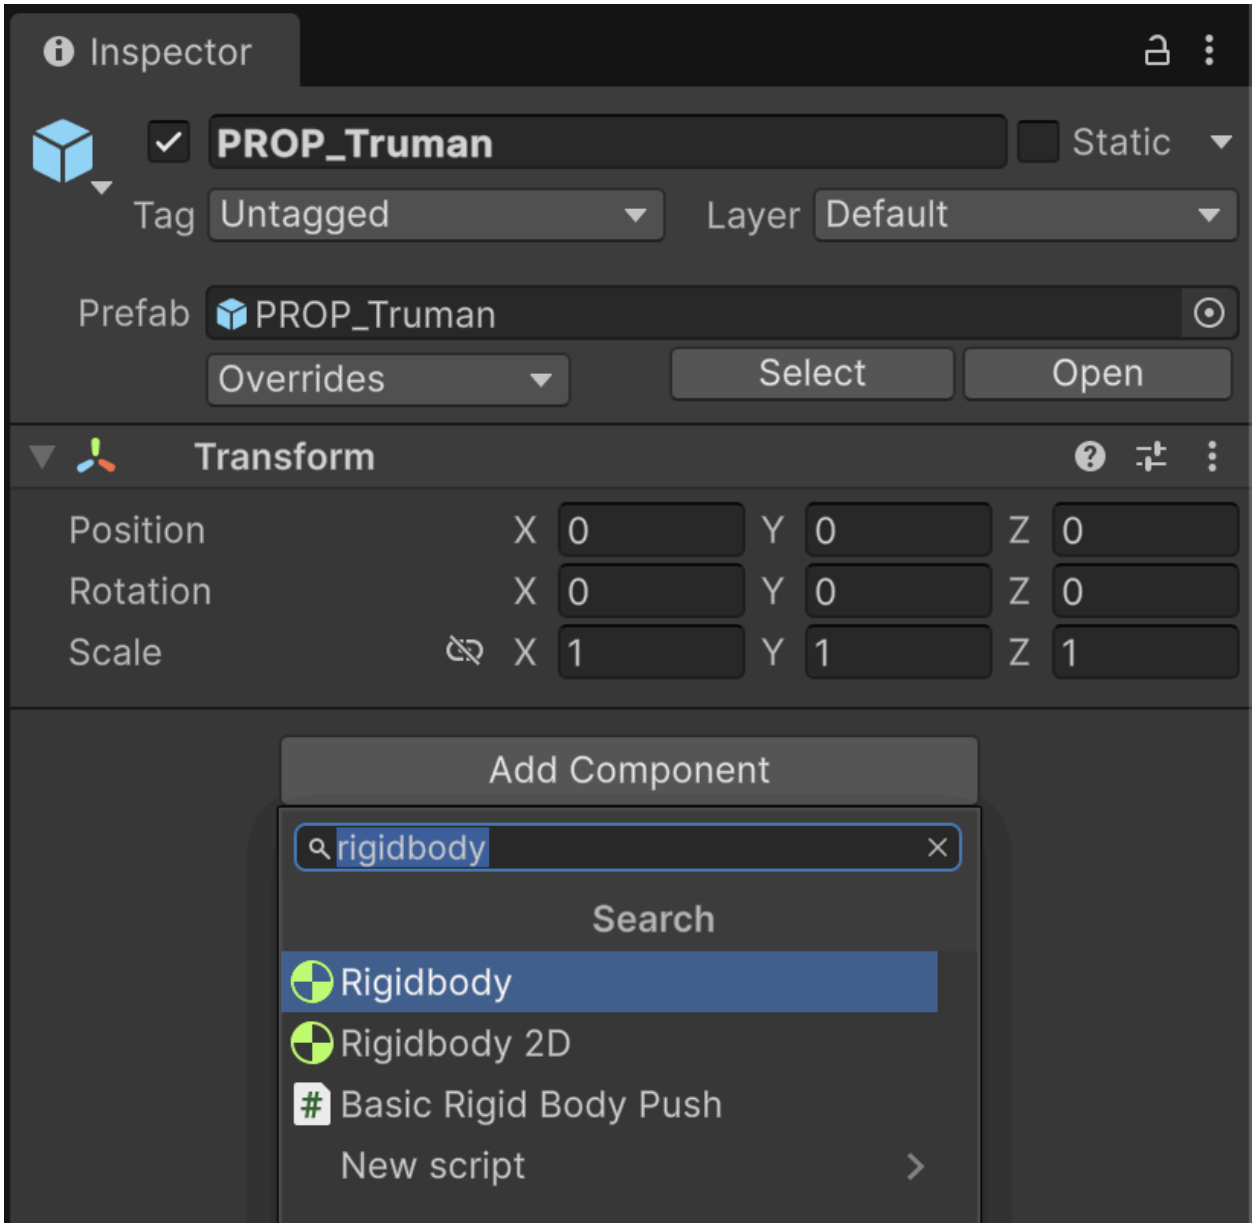


Use Naming convention:

PROP_<yourname>.fbx

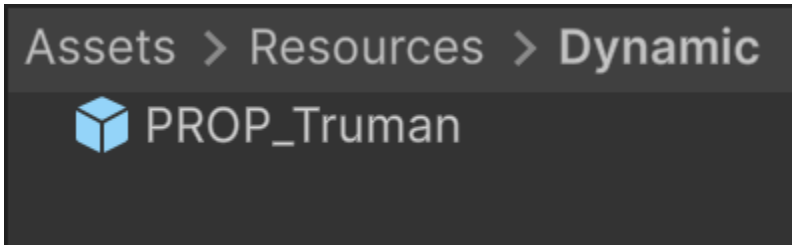
Eg: PROP_Truman.fbx

Add a Rigidbody to the Object:



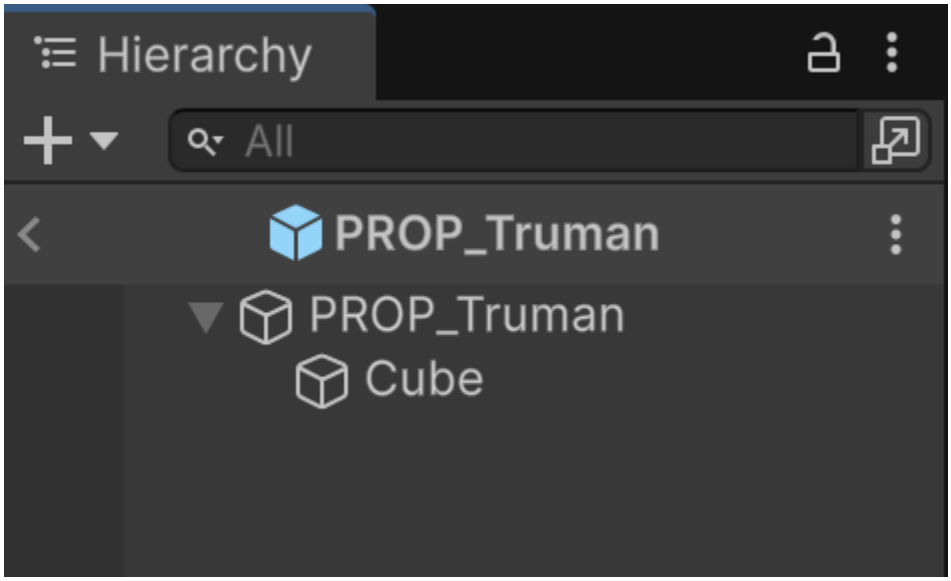
Drag that Object to the Project Panel:

Assets=>Resources=>Dynamic



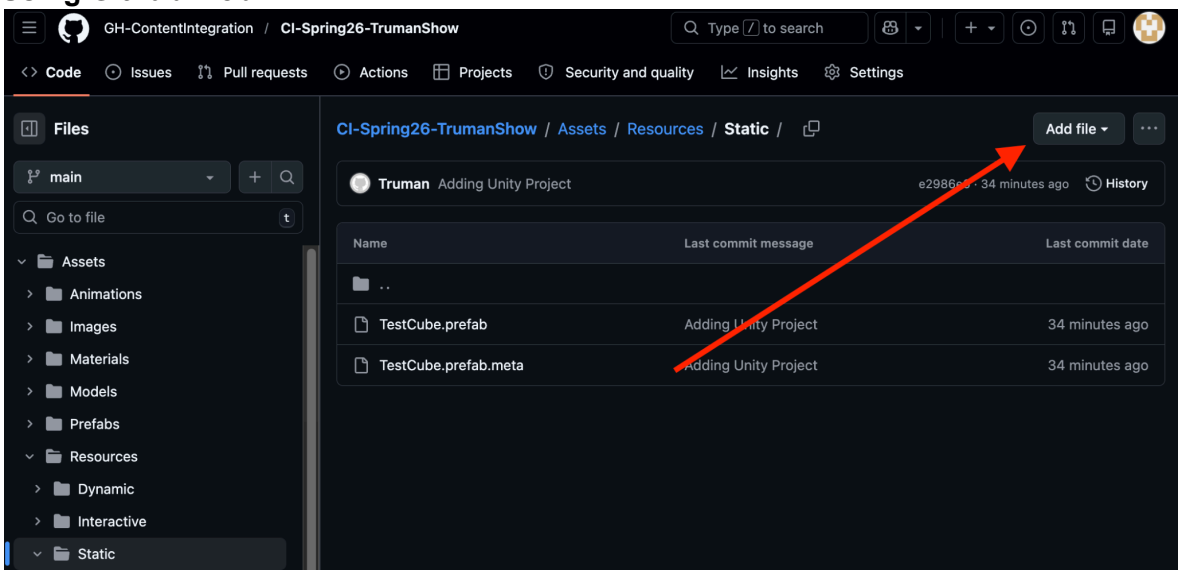
Double click the Prefab, to enter prefab Edit mode, and add any models you want as children:

(eg: +Menu=> 3D Object=> Cube)



Upload to:
https://github.com/GH-ContentIntegration/CI-Spring26-TrumanShow/tree/main/Assets/Resources/Dynamic

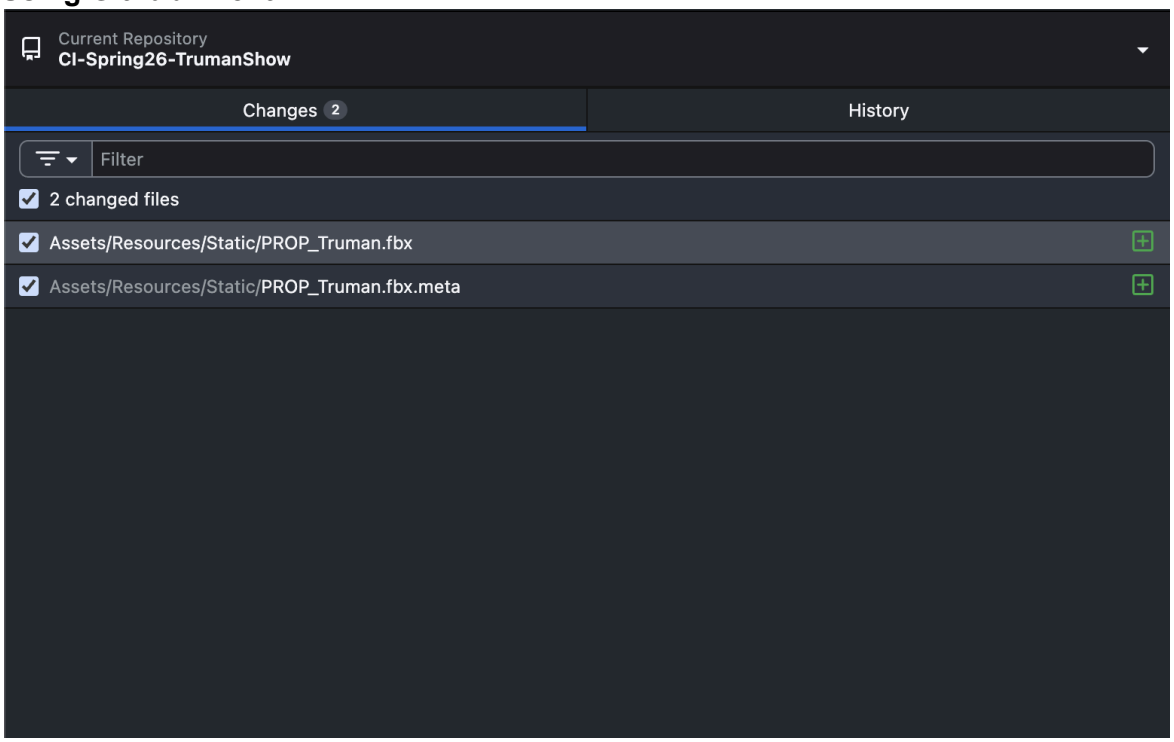
Using Github Web:



Add file=> Upload files

Add a clear commit message

Using Github Client:



Check in the FBX and .meta files
Remember: Commit, Pull, Push

Add a clear commit message
