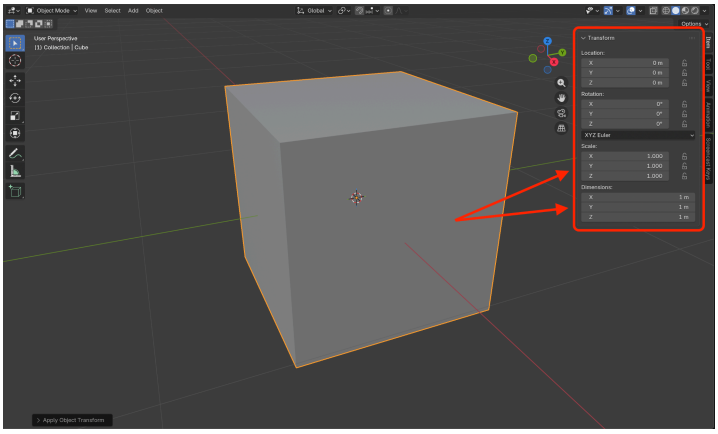
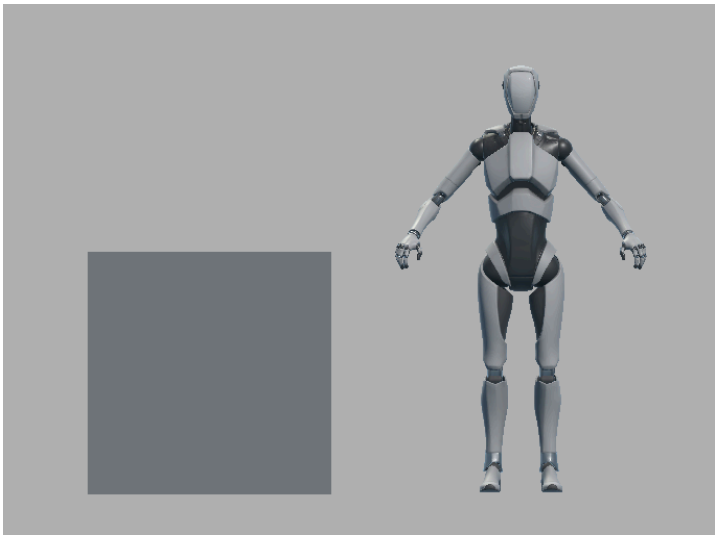
Make a Static Asset

In Blender, model an asset.

Focus on scale and orientation:

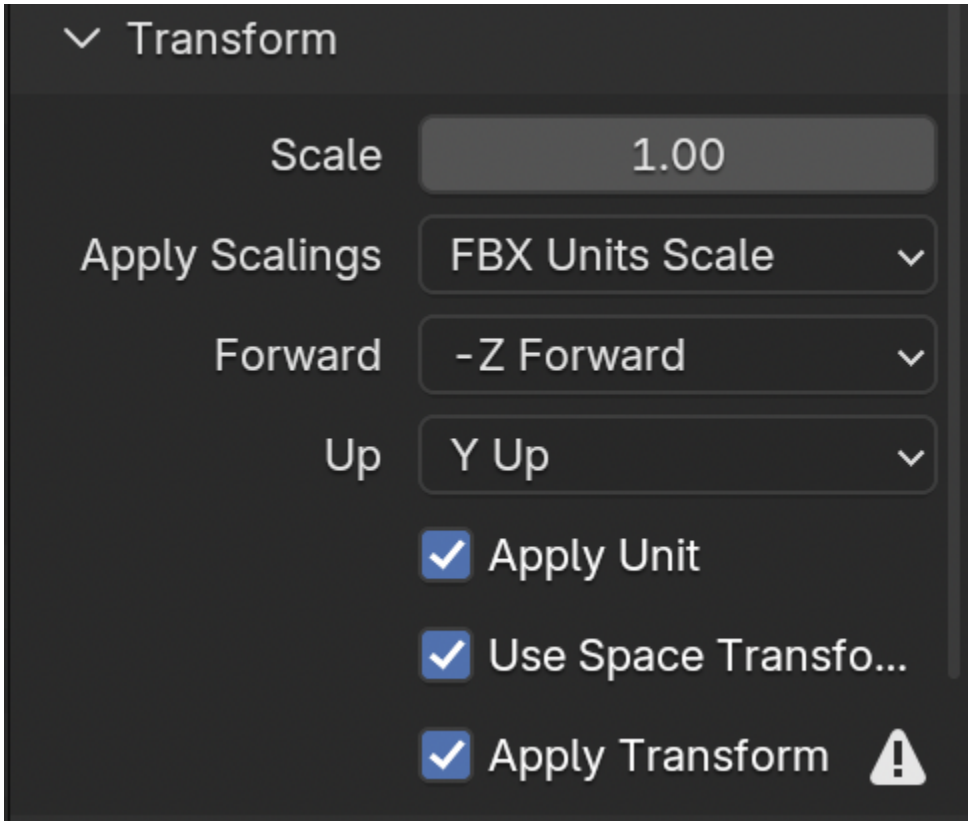


In Blender: Make sure to apply (Object=> Apply=> All Transforms) these settings, before export.
Note: To see this menu Press “N” in the viewport



The same 1M cube in Unity, Relative to a standard sized Humanoid Character

Export with these settings:



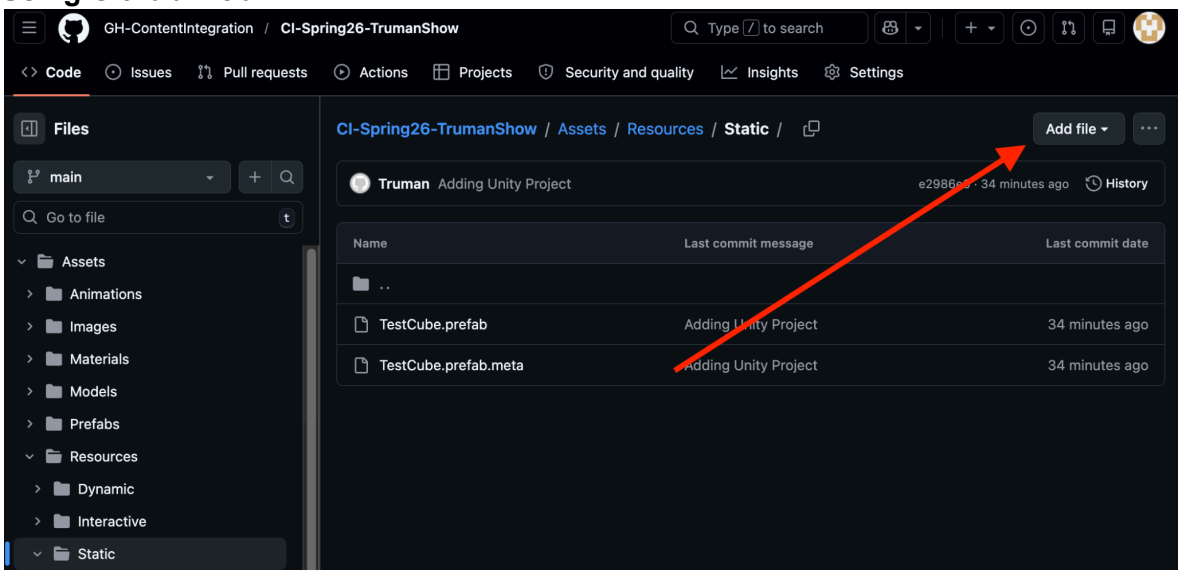
Use Naming convention:

PROP_<yourname>.fbx

Eg: PROP_Truman.fbx

Upload to:
https://github.com/GH-ContentIntegration/CI-Spring26-TrumanShow/tree/main/Assets/Resources/Static

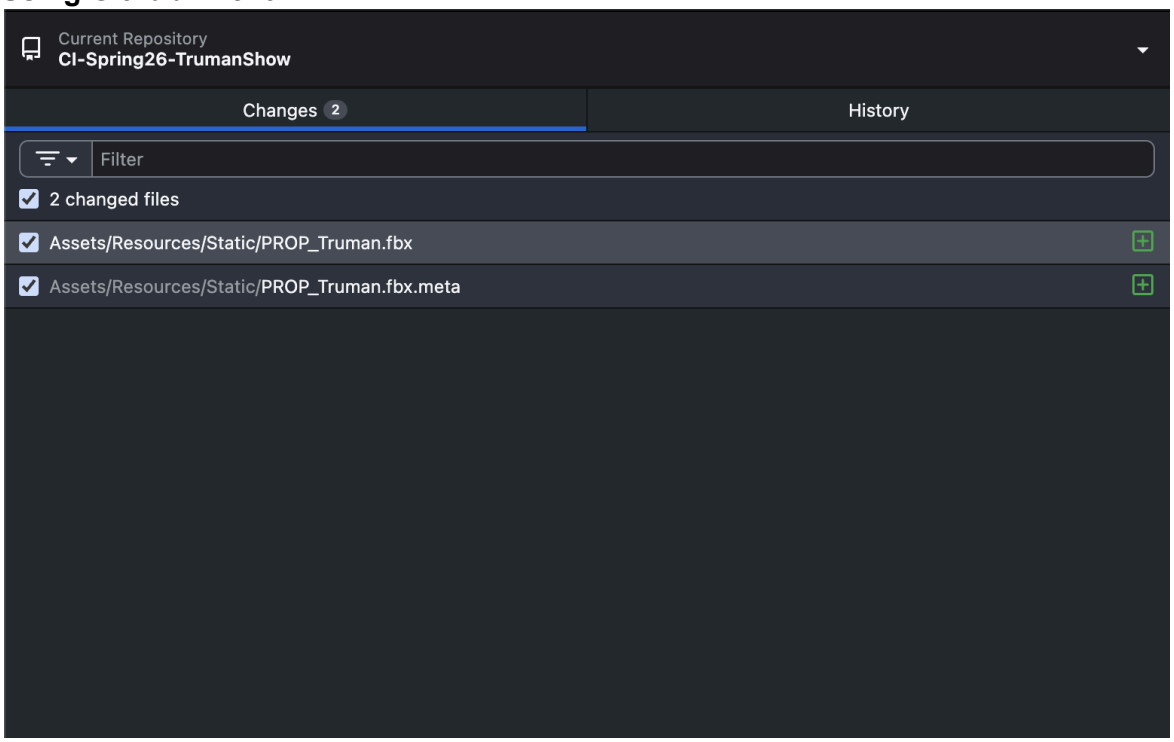
Using Github Web:



Add file=> Upload files

Add a clear commit message

Using Github Client:



Check in the FBX and .meta files
Remember: Commit, Pull, Push

Add a clear commit message
